### DETAILED ACTION

1. This action is responsive to the communication filed on May 16, 2007. Claims 1-31 are pending. At this time, claims 1-31 are still rejected.

#### ***Response to Arguments***

2. Applicant's arguments filed May 16, 2007, with respect to the rejection(s) of claim(s) 11 and 12-20 under 35 USC 101 have been considered and are persuasive. Therefore, the rejection of the 35 USC 101 has been withdrawn.

Applicant's arguments filed January 22, 2007, with respect to the rejection(s) of claim(s) 1-16 and 20-22 under 35 USC 102 have been fully considered and are persuasive. Therefore, the rejection of claim(s) 1-31 under 35 USC 102 has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Cudak et al (US 6,058,106).

#### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haines et al (US 2003/0072027 A1), and further in view of Cudak et al (US 6,058,106).

#### ***a. Referring to claim 1:***

i. Haines teaches a method for secure access and communication of information in a distributed media network, the method comprising:

(1) detecting when a legacy media peripheral is connected to at least one of a PC and a media processing system on the distributed media network (see Figure 1 and page 2, paragraph 0019 of Haines);

(2) establishing at least one identifier associated with said legacy media peripheral (page 1, paragraph 0009 of Haines); and

(3) utilizing said established at least one identifier to facilitate communication of said legacy media peripheral over the distributed media network (**page 1, paragraph 0008 of Haines**).

ii. Although Haines teaches a method for secure access and communication of information in a distributed media network, Haines is silent on the capability of showing the legacy media peripheral. On the other hand, Cudak teaches this limitation in column 13, line 14 of Cudak.

iii. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to:

(1) have been modified the invention of Haines with the teaching of Cudak to centrally coordinated peer-to-peer wireless communication system (**column 1, lines 29-30 of Cudak**).

iv. The ordinary skilled person would have been motivated to:

(1) have been modified the invention of Haines with the teaching of Cudak to provide a centrally coordinated peer-to-peer wireless communications network that minimized payload transmissions, greater efficiency would be achieved (**column 2, lines 21-24 of Cudak**).

b. Referring to claim 2:

i. Haines further teaches:

(1) further comprising requesting said at least one legacy media peripheral identifier and at least one identifier of a user utilizing said legacy media peripheral (**page 2, paragraph 0009 and paragraph 0025 of Haines**).

c. Referring to claim 3:

i. Haines further teaches:

(1) wherein said at least one legacy media peripheral identifier is a serial number of said legacy media peripheral (**page 3, paragraph 0040 of Haines**).

d. Referring to claim 4:

i. Haines further teaches:

(1) wherein said at least one user identifier is at least one of a user password and a user name **(page 2, paragraph 0025 of Haines).**

e. Referring to claim 5:

i. Haines further teaches:

(1) further comprising determining a first location (e.g., address) of said legacy media peripheral and said user utilizing said legacy media peripheral **(page 3, paragraph 0040 of Haines).**

f. Referring to claim 6:

i. Haines further teaches:

(1) further comprising associating said legacy media peripheral identifier and said user identifier with said location of said legacy media peripheral **(page 3, paragraph 0040 of Haines).**

g. Referring to claim 7:

i. Haines further teaches:

(1) wherein if said legacy media peripheral previously registered at a first location within said network, acquiring said at least one user identifier to facilitate communication of said legacy media peripheral over the distributed media network **(page 3, paragraphs 0040-0043 of Haines).**

h. Referring to claim 8:

i. Haines further teaches:

(1) further comprising validating said acquired at least one user identifier for said legacy media peripheral prior to said facilitation of communication of said legacy media peripheral over the distributed media network **(page 4, paragraphs 0044-0045 of Haines).**

i. Referring to claim 9:

i. Haines further teaches:

(1) further comprising registering said legacy media peripheral for operation at a second location subsequent to said validation of said acquired at least one user identifier **(page 4, paragraph 0043 of Haines).**

j. Referring to claim 10:

i. Haines further teaches:

(1) further comprising executing a media peripheral association software on said at least one of said PC and said media processing system **(page 4, paragraphs 0047-0049 of Haines)**.

k. Referring to claim 11:

i. This claim consist a machine-readable storage having stored thereon, a computer program having at least one code section for secure access and communication of information in a distributed media network to implement claim 1, thus it is rejected with the same rationale applied against claim 1 above.

l. Referring to claims 12-20:

i. These claims have limitations that is similar to those of claims 2-10, thus they are rejected with the same rationale applied against claims 2-10 above.

m. Referring to claim 21:

i. This claim consist a system for secure access and communication of information in a distributed media network to implement claim 1, thus it is rejected with the same rationale applied against claim 1 above.

n. Referring to claims 22-30:

i. These claims have limitations that is similar to those of claims 2-10, thus they are rejected with the same rationale applied against claims 2-10 above.

o. Referring to claim 31:

i. Haines further teaches:

(1) wherein said at least one processor is at least one of a computer processor, a media peripheral processor, a media exchange system processor and a media processing system processor **(page 3, paragraph 0029 of Haines)**.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
